

How do you promote yourself to the OnGreen community?

OnGreen is building the world's largest community for green business, and here are some tips for marketing yourself to that community:

- Always keep your [OnGreen](#) profile up to date. Upload your picture and a video and comment on other users' profiles
- [Submit a press release](#) about your business
- Start a [Forum](#) or comment upon others
- [Post any events](#) that you are aware of in the community and post your reviews on those events
- Post your reviews on projects in the [Green Exchange](#)
- Add / Claim / Update your [Company](#) listing
- Is your company looking to fill a green job? Post it [here](#)

If there are other ways you have gained success in using OnGreen for your business, do share your success story with us: contact@ongreen.com

Featured Deals

[GREEN Vehicles](#)

GREEN Vehicles is on track to becoming one of the leading manufacturers of battery electric vehicles (BEV) and related technology. The company, based in California, is one of only two U.S. manufacturers to deliver lithium-ion powered electric vehicle to date. GREEN also shines a flashlight on sustainability and eco-efficiency via vehicle design, manufacturing and driving assistance, building preference within a large and growing consumer group.

[Coyle Industries](#)

Portable solar powered generators and water treatment systems for distributed electrical generation and clean water creation ideal for emergency electrical backup, developing countries, agricultural irrigation, remote construction, outdoor music and sporting events. The product requires no set-up, is portable, operates

in complete silence, requires no refueling, and is completely free of emissions.

Digital Sun

The S.Sense sprinkler system controls irrigation for the user with sophisticated soil moisture sensors and low-power wireless technology. Delivers an average of 20% savings on the average residential water bill paying for itself on 10 months before taking into account smart technology rebates.

Financing and Entrepreneurial Opportunities in Greentech

These are just a few of the GreenTech companies that have raised significant growth capital recently. Is GreenTech the next wave of entrepreneurship that will be a potent engine of economic growth this decade? The need to decrease our reliance on non-renewable energy sources, to slow the pace of climate change and to manage our increasingly scarce sources of clean water has created numerous opportunities for entrepreneurs and inventors. It has also opened up new sources of financing opportunities for GreenTech ventures. Join us for a program focusing on entrepreneurial opportunities and financing avenues in the green technology sector.
