Message from Nikhil R. Jain, CEO/Founder

Looking back, despite some challenges, 2010 proved to be a strong year for CleanTech investment. Q1 started off on a record pace and, despite a Q3 slowdown, investment the first three quarters of 2010 surpassed all of 2009. At OnGreen, we completed our own Series A round, added several senior staff positions, saw dramatic growth on our Deal Marketplace and added several exciting new features, including the OnGreen Patent Exchange.

Looking forward, 2011 is being heralded as the year of CleanTech, and OnGreen is hitting the ground running. Our Deal Marketplace continues it's rapid growth, with well over \$1.5B in green investment opportunities on the site, and we're adding more expertise and automation to identify and promote the best of those opportunities. As noted below, Mark Bernstein, a former energy adviser to the Clinton White House and Rand researcher, [joins the OnGreen executive](#)

[team](#) this month and will lead our effort to vet and showcase the highest quality deals in our extensive database.

As we continue to grow, we're improving OnGreen.com and our community offerings. With this edition, our Newsletter gets a facelift. Later in the quarter, you'll see a new user interface and new features on the OnGreen site. We're excited about the prospects for 2011, and we'll be delivering on our new year's resolution: drive more money and opportunities to the planet's most promising green technologies.

If you're not already "[On](#)", come join us!

Best Regards and Happy New Year!

Nikhil R. Jain
CEO/Founder

Partner Events
